BSIT - 3B (ST)

DESCRIPTION

Flora - Discover Philippine Plants & Flowers Flora is your ultimate companion for exploring and expanding your knowledge of the rich and diverse plant life in the Philippines. Whether you're a passionate botanist, a nature enthusiast, or simply curious about the wonders of the plant kingdom, Flora is designed to provide you with a comprehensive database of plants and flowers found in the Philippines.

Flora is a beautifully designed and user-friendly application that aims to foster a deeper appreciation for the stunning plant life that thrives in the Philippines. Embark on a botanical journey, expand your knowledge, and contribute to the growing community of plant enthusiasts with Flora.

LIST OF FEATURES

Explore Philippine Plant Life: Dive into a vast collection of plants and flowers native to the Philippines. Discover their scientific names, common names, descriptions, and stunning visuals captured by passionate photographers.

Plant Details: Get in-depth information about each plant or flower, including their habitat, growth patterns, medicinal uses, cultural significance, and more. Uncover fascinating facts and learn about their unique characteristics.

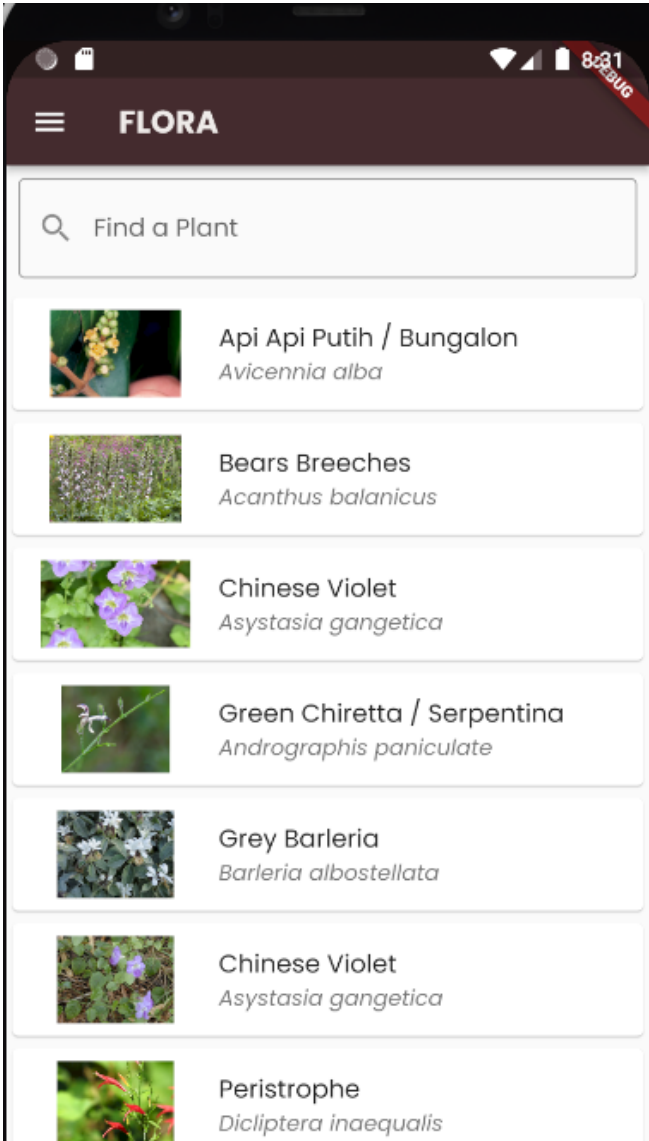

Search and Filters: Easily find specific plants or flowers using the search function or apply filters based on categories such as plant type, color, region, or endangered status. Narrow down your search and explore plants that match your interests.

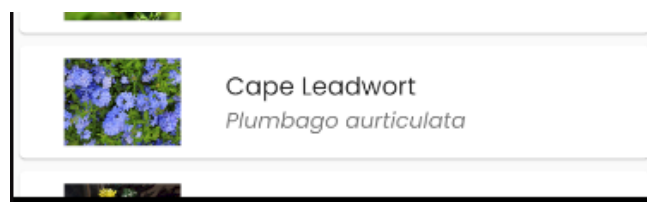

Add New Plants: Contribute to the Flora community by adding new plants or flowers that you encounter in your own botanical explorations. Share your findings with other users and help expand the knowledge base.

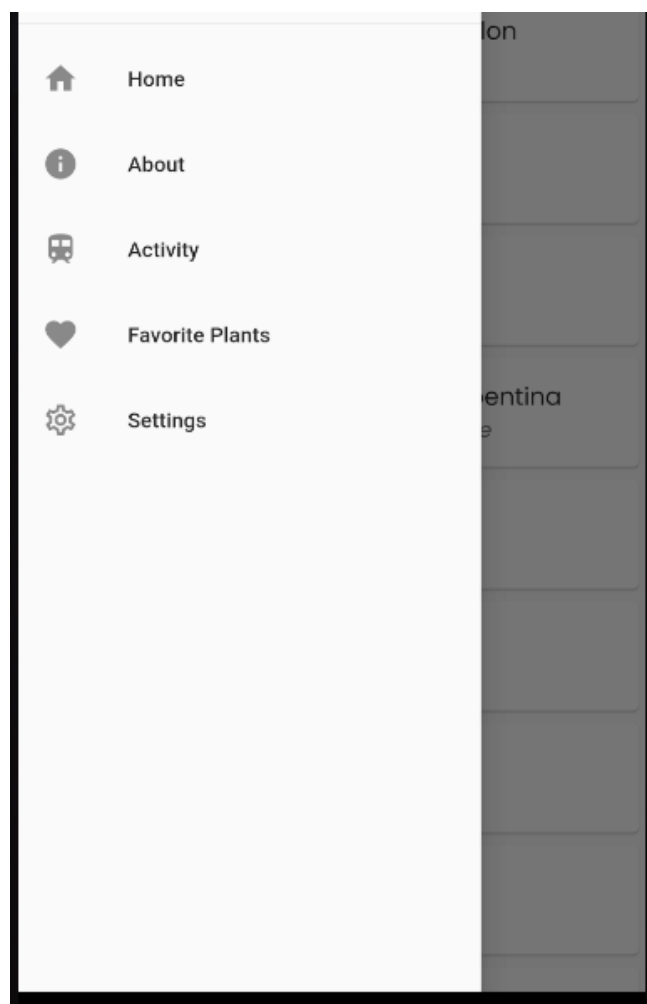

Favorites and Collections: Create your personal collections of favorite plants or flowers. Bookmark and save the ones that capture your interest or inspire you. Organize them into custom collections for easy access and reference.

Help and Support: Have questions or need assistance? Access the built-in help and support section to find FAQs, contact the app developer, or provide feedback. Get the guidance you need to make the most of your Flora experience.

SCREENSHOTS OF THE APPLICATION

Flora is an informative smartphone application that may enlighten users about the plants that grow naturally in the Philippines. Flora includes grasslands, forests, flowering and non-flowering plants and trees, and so forth.
